

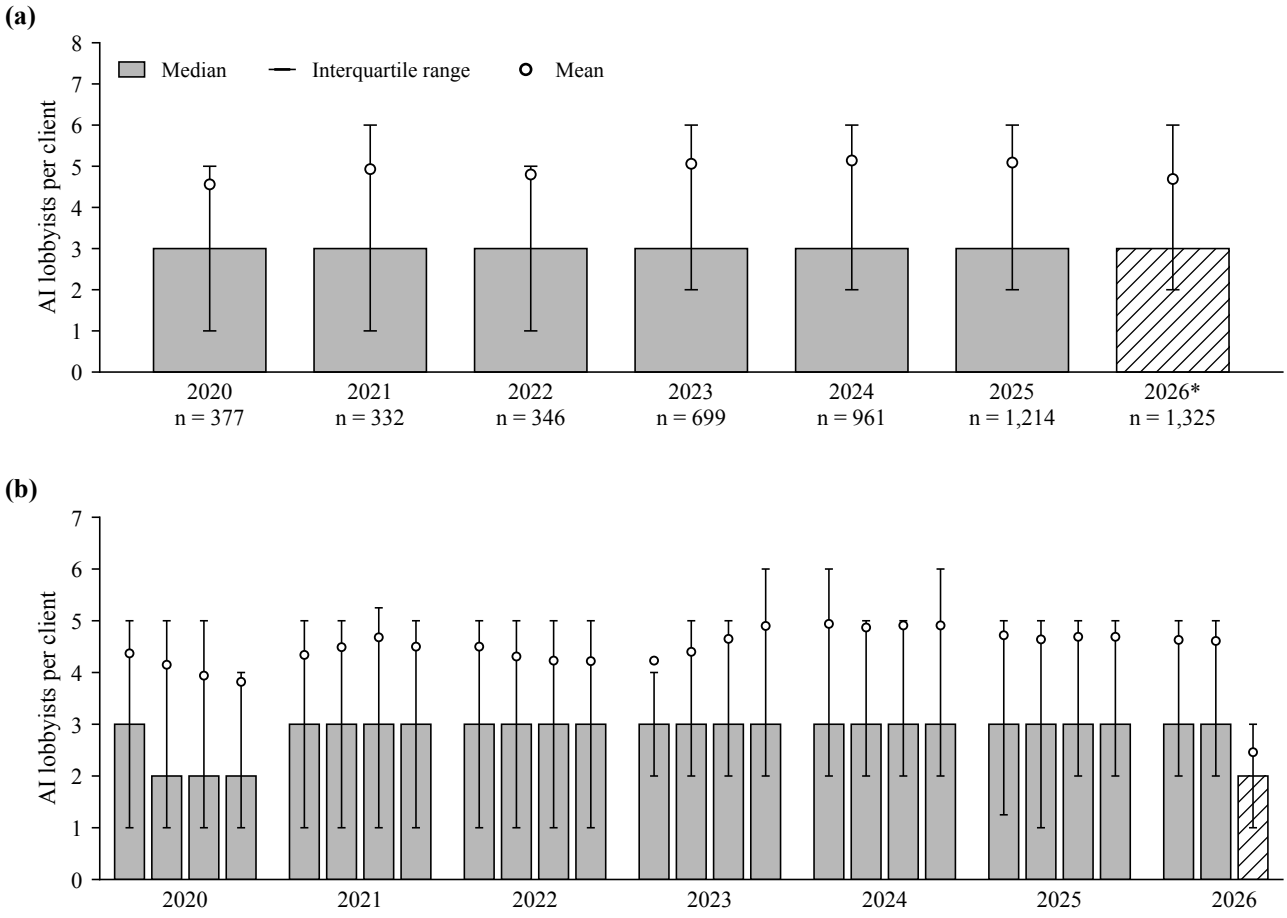

Figure 2. AI lobbyists per client, 2020–2026. (a) Per year: each client's team is the set of unique lobbyists, in-house or at outside firms, named on its AI-related LD-2 issue sections that year; n is the number of clients. (b) Per quarter, defined the same way within each quarter. Bars show the median team size, whiskers the interquartile range, and circles the mean. AI-related sections are those whose descriptions mention artificial intelligence (or a variant), autonomous vehicles or systems, or data centers; amended reports replace the originals; clients are matched by name. Hatched bars and asterisk mark incomplete periods: reports for Q3 2026 were not yet due when the data were retrieved on October 15, 2026.
